

That's what you get with the world's most powerful system for tracking, monitoring, and analyzing wireless IT assets.

100% process. 100% control. 100% happiness.

YOU'RE ACCOUNTABLE FOR MILLIONS OF DOLLARS IN TECHNOLOGY ASSETS. Countless megabytes of critical data. Hardware and software in unending combinations of images and platforms. Laptops, smart phones, PDA's, electronic kiosks, and wireless PCs. What if you could track each one of them—its use, repair history, configuration, warranty, software. And what if you could compute the total cost that each of these assets translates into for your company. You just might end up saving thousands of dollars in unnecessary fees. Who's smiling now?

It's all possible with INTEGRON Asset Management System. It's a suite of proven software and processes that streamlines distributed asset management, including:

- Deployment
- Overnight hot spares
- Repair turnaround
- Warranty management
- Image updates
- Activation/transfer for wireless WAN devices

YOU'VE NEVER BEEN ABLE TO TRACK ASSETS LIKE THIS BEFORE. The system is accessed through a customized Web portal. It lets you view and monitor the activity of every single asset in the field. With INTEGRON Asset Management System, you can track real-time data like never before—by individual user as well as enterprise wide.

- Measure complete fleet performance by percentage of hardware failures, non-warranty repairs, and no problems found.
- Parse by platform, machine model, company, end user, or region.
- Improve help-desk troubleshooting.
- Enhance software stability.
- Reconcile invoices to real-time activity—no more paying for wireless devices that have actually been de-activated.
- Monitor overall trends, analyze costs, and understand total cost of ownership.

INTEGRON ASSET MANAGEMENT SYSTEM

Real time equipment activity throughout the life cycle is tracked for analysis. From the birth record, initial deployment, provisioning and transfer transactions with airtime providers, configuration changes, device failure (Or, in this case, an avoided failure.), and subsequent remote transfer or equipment movement in the field. All of these functions and more are detailed for review with INTEGRON Asset Management System.

BUILT UPON NEARLY 20 YEARS OF DATA. INTEGRON Asset Management System has collected and analyzed nearly two decades of human and technology asset “behaviors.” Like how hardware will perform in certain environments. How best to manage software installations. How and why equipment breaks down. How often it will be lost, broken, or stolen. This critical data is built right into our software. And it can make a huge difference in the way you invest in technology today and tomorrow.

Integron has helped hundreds of Fortune 1000 customers better manage their assets. With INTEGRON Asset Management System, we'll manage your assets or you can manage them yourself through our web-hosted service. Either way, you gain control you never had before. Let us show you how it can be done. Call 585-426-6200 or email info@integron.com today for a free demo.

GENUINE ASSET MANAGEMENT.
