

IAM V⁴® Gives Asset Tracking New Meaning!

WHETHER YOU HAVE A CRANE, PLANE OR TURBINE, THERE ARE CERTAIN ASSETS WORTH TRACKING.

The Integron Asset Manager® gives tracking new meaning; reflective of the real work a serialized device performs. Its location, movement, change in configuration, most importantly is IAM V⁴® capability to inform you of conditional status changes and prompt a call to action.

The definition of an asset is customizable. So too are the incidents that trigger a call to action and management alerts. Process documents are configurable. Asset properties are based on business rules... Your business rules!

Asset Tracking with a logistics and conditional capability mapping to the real world.

IAM® is offered as a Software as a Service saving you from all the hardware and maintenance responsibility.

- Monitor Device Movement
- Apply Out Of Custody Rule

Generate Demurrage Invoice

- Capture Device Usage Hours
- Calculate Maximum Rental Hours Billed

Create Invoice for Excess Hours Used

- Inspect Device
- Calculate Status Change

Perform Preventive Maintenance

- Measure Device Output
- Compare Against Consumable Yield

Ship Supply Replenishment

- Record Repair Incidents
- Measure time between incidents

Remove From Service

- Monitor Lease End Term
- Inspect Condition

Issue Missing & Damaged Invoice

The history of incidents and activities in the life of a device as it performs work is accessed through a web portal. Anywhere in the world information can be captured using wireless devices, GPS, M to M Applications or direct E Feeds or XML.

AT THE END OF A DAY YOU CAN KNOW...

- If the device has passed or failed an inspection
- If a repair was needed and why
- If a transfer of custody took place and to whom or where or both
- If a device is actively performing work or not
- If a metering condition trips a call to action
- If a device is overdue

INTEGRON ASSET MANAGER V⁴® A SAAS OFFERING

Management information gleaned from fast paced assets doing real work like you've never seen before.

THE VALUE FROM TRACKING THE IAM V⁴® WAY CAN BE REWARDING.

- Trigger an invoice for usage
- Recapture money for excessive wear and tear
- Issue distribution of consumable supply replenishment
- Determine device outages and causal
- Do a deep dive into performance and reliability
- Recapture warranty dollars
- Manage the status and condition of leased devices
- Recall or bill for overdue devices

TRACKING SERIALIZED ASSETS
IN THEIR WORK FLOW
OPTIMIZES INVENTORY
AND ENHANCES THE
BOTTOM LINE.

IAM V⁴® DELIVERS VISIBILITY, VALIDATION, VELOCITY AND VALUE FOR ASSETS WORTH TRACKING THE IAM V⁴® WAY.

- Visibility - What, Where, When, Who
- Validation - Config, Version, Condition, Causal
- Velocity - Cycle-time, Return to Revenue, Return to Inventory
- Value - Utilization, ROI, COC

The Integron Asset Manager® delivers the information to make GO / NO GO decisions, identify asset performance, calculate operating costs and return on assets.
